

Utilizing a precision potentiometer, the UniMeasure HX-PA Series position transducer provides basic absolute positioning with an analog output. With a steady state input voltage, and with the potentiometer connected as a voltage divider, the ratiometric output voltage is directly proportional to wire rope extension. The unit will function with any input voltage up to 30 volts maximum. To obtain best output linearity, the input voltage should be well regulated.

| NYLON JACKETED WIRE ROPE RANGES TO 80" ONLY                 | N                    | Replaces standard stainless steel wire rope with Ø.018 nylon jacketed wire rope. This option increases wire rope life dramatically but may increase non-linearity by as much as ±.05% of full scale.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| NYLON JACKETED WIRE ROPE RANGES 100" TO 500" ONLY           | J                    | Replaces standard stainless steel wire rope with Ø.037 nylon jacketed wire rope.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| REVERSED OUTPUT                                             | R                    | Output is at a maximum when wire rope is fully retracted. Output decreases as wire rope is extended. Does not apply to velocity signal.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| IP-68, (NEMA 6) CAPABILITY                                  | 2                    | Connector is replaced with a bulkhead fitting and a designated length of urethane jacketed, shielded, twisted pair cable. Retraction mechanism and electrical components are sealed to IP-68, (NEMA 6) capability.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| CORROSION RESISTANT CONSTRUCTION                            | 3                    | All external anodized aluminum parts of transducer are replaced with stainless steel and corrosion resistant plastic. Transducer is sealed to IP-68 (NEMA 6) capability. Urethane jacketed, shielded, twisted pair cable exits unit. No connector on unit.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

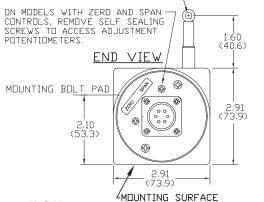

# **DIMENSIONAL INFORMATION**

# HX SERIES - RANGES TO 80" (2 m)

# TABLE 14

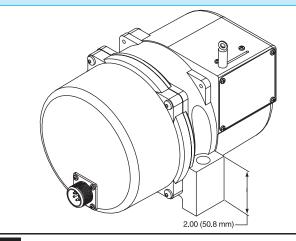

1. Transducer mounts with Ø.25 or M6 Socket head cap bolts.

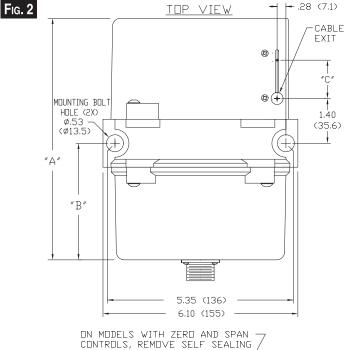

| RANGE          |      | " <b>A"</b><br>(mm) |      | <b>"B"</b> (mm) |
|----------------|------|---------------------|------|-----------------|
| Ranges to 800" | 7.70 | (196)               | 3.80 | (97)            |
| 1000" to 2000" | 11.0 | (280)               | 5.60 | (142)           |

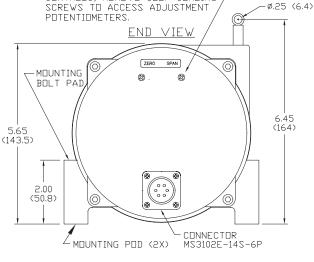

#### NOTES:

- 1. Transducer mounts with Ø.50 or M12 socket head cap bolts.
- 2. Dimension "C" is the cable offset that occurs as the cable is extended from the transducer. For "C" in inches, C = .0016 x E where E = extension in inches. For "C" in millimeters,  $C = .0016 \times E$  where E = extension in mm.

# HX SERIES - RANGES GREATER THAN 80" (2 m)

Dimensions in brackets are millimeters
